SENIOR FRONTEND ENGINEER

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years of experience building scalable, high-performance web and mobile applications across telecom, fintech, and enterprise industries.

Expert in **React, Angular, and modern frontend architecture**, with strong focus on performance optimization, reusable component systems, and real-time applications (WebSocket).

Proven track record in improving application performance, accelerating delivery cycles, and contributing to production-grade systems used at scale. Experienced in cross-functional collaboration and mentoring engineers.

CORE SKILLS

Frontend: React.js, Next.js, Angular
Mobile: React Native
Languages: JavaScript, TypeScript, HTML5, CSS3
Styling: Tailwind CSS, Bootstrap, Angular Material
Tools: Git, GitLab, Node.js
Other: REST API, WebSocket, Responsive Design, Performance Optimization

---

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

Axiata Digital Labs | Aug 2023 – March 2026

- Led frontend architecture using **React and Angular** across multiple enterprise projects
- Designed modular and scalable UI systems, improving maintainability and development speed
- Optimized rendering performance and reduced load times for large-scale applications
- Mentored engineers and enforced best practices (code review, structure, performance)
- Collaborated with backend, product, and QA teams to deliver production-grade platforms

Key Impact:

- Improved development efficiency through reusable architecture
- Reduced technical debt and improved long-term scalability

Frontend Developer

Axiata Digital Labs | Jul 2020 – Aug 2023

- Developed enterprise applications using **Angular** for telecom and digital platforms
- Built reusable UI components to standardize development across projects
- Implemented **real-time features using WebSocket**
- Integrated REST APIs and ensured responsive UI across devices

Key Impact:

- Increased UI consistency across multiple systems
- Accelerated feature delivery through reusable components

Senior Software Engineer

PT Kreasi Digital | Jan 2020 – May 2020

- Developed web applications using **React, Angular, and Laravel**
- Built responsive UI and integrated frontend with backend services
- Ensured clean code practices and consistent UI implementation

---

Senior Web Developer

Ayo Media Network | Oct 2019 – Dec 2019

- Developed and optimized web platforms using **Vue.js, PHP, CodeIgniter, MySQL**
- Implemented responsive UI and improved system performance
- Supported cross-platform integration with mobile apps (Flutter)

Frontend Web Developer

PT Bank BTPN Tbk | Jun 2019 – Sep 2019

- Built banking web interfaces using **Angular and Angular Material**
- Focused on responsive design and performance across devices
- Ensured UI consistency for digital banking applications

Web Developer

Bisnis Indonesia Sibertama | Jun 2018 – Aug 2019

- Developed web applications using **Angular, JavaScript, and Flutter**
- Integrated backend services using PHP (CodeIgniter)
- Built responsive UI with Bootstrap and implemented interactive features (AJAX)

Software Developer

Bisnis Indonesia Group | Aug 2015 – Jul 2018

- Maintained and developed internal systems using **PHP, CodeIgniter, MySQL**
- Built responsive UI and hybrid mobile apps using Ionic
- Contributed to multiple business-critical digital platforms

---

Junior Software Engineer

Springfields Asia | Aug 2013 – Dec 2013

- Supported development of web applications using **PHP, HTML, CSS, JavaScript**
- Assisted in debugging, feature development, and UI implementation

---

KEY PROJECTS

- **Connectivity+ (2024 – 2026)**
- Built scalable frontend applications using React Hooks and TypeScript
- Designed modular architecture for long-term maintainability and scalability
- Collaborated with backend teams to integrate RESTful APIs and optimize application performance
- Implemented responsive UI components and reusable design patterns

- **Axonect – Sri Lanka Project (2024 – 2026)**
- Developed enterprise-grade user interfaces using Angular 14 and Tailwind CSS
- Delivered consistent user experiences across multiple regions and business units
- Implemented reusable components and optimized frontend performance
- Collaborated with cross-functional teams in an agile environment

- **Telin Dashboard (2023 – 2026)**
- Built interactive dashboards using Angular Material and TypeScript
- Developed complex data visualization and reporting features
- Integrated APIs and implemented real-time data monitoring capabilities
- Improved usability through responsive and user-friendly interfaces

- **Accessibility Widget (2023 – 2024)**
- Created reusable accessibility widgets supporting multi-framework integration
- Improved compliance with accessibility standards (WCAG)
- Developed configurable components for easy integration across multiple projects
- Enhanced user experience for users with accessibility needs

- **eWorking Permit XL Axiata (2023 – 2024)**
- Developed digital permit management system for operational and field activities
- Built frontend modules using Angular and TypeScript
- Streamlined permit approval workflows and status tracking
- Integrated role-based access control and notification features

- **XL – Business As Usual (BAU) Automation (2023 – 2024)**
- Developed automation solutions to improve operational efficiency
- Created workflow management and monitoring dashboards
- Reduced manual processes through system integration and automation
- Collaborated with business stakeholders to optimize existing workflows

- **ADA-WA BSP (Business Solution Platform) (2022 – 2023)**
- Developed and maintained web applications using Angular and TypeScript
- Implemented customer engagement and communication features
- Integrated third-party APIs and backend services
- Enhanced system performance and user experience

- **BAT (British American Tobacco) (2022 – 2023)**
- Developed enterprise web applications supporting internal business processes
- Built reusable UI components and responsive layouts
- Collaborated with international teams to deliver scalable solutions
- Participated in application enhancement and maintenance activities

- **NewXLife (2022 – 2023)**
- Developed digital platform features using Angular and modern frontend technologies
- Implemented responsive user interfaces and API integrations
- Improved application performance and maintainability
- Supported deployment, testing, and production releases

MOBILE EXPERIENCE

Mobile Apps Rare (2025 – 2026)

- Developed mobile app using **React Native & Redux-Saga**
- Implemented scalable architecture for maintainability

Mobile Apps Ayo Jakarta

- Developed mobile app using **Flutter & firebase**
- Implemented scalable architecture for maintainability

EARLIER PROJECTS

- POS System (React.js)
- Joint Finance System – BTPN (Angular)
- Webinar Platform (MeteorJS, AWS, Docker)
- E-Magazine Bio Farma (AngularJS, Ionic)

EDUCATION

Bachelor's Degree in Informatics Engineering
Universitas Komputer Indonesia (UNIKOM) | 2007 – 2010

ADDITIONAL

- Basic Backend: Laravel and Nestjs
- Medium: https://medium.com/@dedikusniadi
